SUMMARY

I like to create, design, and build. I spend most of my time leveraging knowledge and experience towards launching a successful career as a front-end developer and beating project deadlines.

TECHNICAL SKILLS

HTML5, CSS3, Sass, Bootstrap, JavaScript, jQuery, Ionic, AngularJS
NodeJS, Restful API, Neo4j, MySQL, npm, Git, WebStorm
Wordpress, Visual Composer, Photoshop, Lightroom

EXPERIENCE

OC Web Kings | Web Developer

Nov 2015 - Present, Newport Beach, CA

- Implement mock up design from PSD to responsive web page with HTML & CSS, Sass and Bootstrap/Ionic
- Build front end functionality using AngularJS and Ionic
- Optimize web page for tablet/mobile and work with cross-browser compatibility issues
- Work closely with designers to ensure UI quality control and acquire assets
- Manage and lead multiple projects by organizing task boards and attending meetings with teammates and clients
- Maintain clear communication with clients to obtain work progress satisfaction and receive request/feedback
- Set up domain and hosting, install WordPress, implement design with Visual Composer and maintain Wordpress websites
- Run through web pages with MozBar for on-page SEO, check Moz Pro to monitor ranking and performance and use Google Analytics for analytics
- Write rewrite rules for 301 redirects to prevent 404 errors and crawl errors
- Work with databases such as Neo4j and MySQL
